WHY CHOOSE *Refinishing?*

There are currently three options when you have a worn, tired bathroom. You can replace the fixtures, cover them up with liner or refinish them. Refinishing is inexpensive. The finish product lasts for years and is easy to clean.

Refinishing CORRECTS

CHIPS, RUST & SCRATCHES Our thorough process includes repairs to most problems.

UNATTRACTIVE COLORS Our extensive color choices go with any decor.

TILE PROBLEMS Refinish tile walls at the time for complete redo.

DULL COLOR Refinish tubs & the tile to give them a brilliant, durable & easy to clean finish.

DANGEROUS TUBS We can easily add a slip resistant surface.

WHY *Refinish* COUNTERTOPS, CABINETS & VANITIES

Most of the time older countertops are structurally fine. The very top surface might be damaged, or maybe the color gives your kitchen or bath a dated feel. Refinishing gives your counters, and your kitchen or bath, new life for a fraction of the cost of replacement.

SAVE COST Refinishing can save 70% or more over the cost of replacement.

MODERN LOOK Using our flint-stone topcoat, you get the beautiful look of stone.

NO MESS Replacement means ripping out existing countertops, sinks, fixtures, even possible plumbing. None of this is required when refinishing.

FAST Refinishing is done in one day. Replacement can take weeks to order and measure.

NO MAINTENANCE Refinishing doesn't require yearly sealing like granite.

Color Options

There are several options for colors to go with your decor. That way you don't need to change anything else in your kitchen or bathroom. Our multi colored coatings has flecks in it that gives the look of stone without the cost. This is the look you want. No maintenance either.

Amarillo Yellow

Autumn Blaze

Avalanche

Birchbark

Bisque

HOW THE PROCESS WORKS

- Cabinets, back splash and fixtures are masked to keep clean, we also protect the floor.
- Any grease, oil, and dirt are cleaned from your counters with specialized cleaners.
- Scratches and chips are fixed with compounds specifically formulated for this purpose.
- The surface is prepped to ensure adhesion.
